Thin Solid Films 274 (1996) 170–172

thin solid films

Subject Index of Volume 274

Adsorption
anomalous temperature dependence of electrical resistivity in $Pb_{0.8}Sn_{0.2}Te$ thin films, 55
Alkylsilanes
SiC thin film preparation by ArF excimer laser chemical vapor deposition. Part 1: Rate of photolysis of alkylsilanes by ArF excimer laser and their decomposition products, 70
Alloys
performance of laser-consolidated plasma-spray coatings on Fe–28Mn–7Al–1C alloy, 95
mixed-sputter deposition of Ni–Ti–Cu shape memory films, 101
Anisotropy
anisotropy micro-ellipsometry for in-situ determination of optical and crystallographic properties of anisotropic solids and layers with Ti/TiO_2 as an example, 82
Antimony
epitaxial effects on film growth and interdiffusion at Bi–Sb interfaces, 76

Band structure
internal photoemission and photoconduction on GeO_2/Ge films, 133
Bismuth
epitaxial effects on film growth and interdiffusion at Bi–Sb interfaces, 76

Cadmium
comment on: "Correlation between the optical and electrical properties of CdO thin films deposited by spray pyrolysis", 1
Cadmium telluride
effect of deposition parameters on the optical absorption in thermally evaporated cadmium telluride thin films, 120
Carbon
surface-enhanced Raman spectroscopy of monolayer C_{60} Langmuir–Blodgett films, 147
Chemical vapour deposition
influence of process parameters on diamond film CVD in a surface-wave driven microwave plasma reactor, 3
structural characterization of CVD diamond films using the ESR method, 50
oriented and textured growth of (111) diamond on silicon using hot filament chemical vapour deposition, 160
Clusters
growth of ZnTe films by ionized cluster beam epitaxy at low temperature, 46
Computer simulation
film edge-induced stress in substrates and finite films, 106

Deposition process
structural studies of parasexiphenyl thin films: importance of the deposition parameters, 35
effect of deposition parameters on the optical absorption in thermally evaporated cadmium telluride thin films, 120

Diamond
influence of process parameters on diamond film CVD in a surface-wave driven microwave plasma reactor, 3
structural characterization of CVD diamond films using the ESR method, 50
oriented and textured growth of (111) diamond on silicon using hot filament chemical vapour deposition, 160

Elastic properties
film edge-induced stress in substrates and finite films, 106
Electrical properties and measurements
comment on: "Correlation between the optical and electrical properties of CdO thin films deposited by spray pyrolysis", 1
anomalous temperature dependence of electrical resistivity in $Pb_{0.8}Sn_{0.2}Te$ thin films, 55
Electron diffraction
optical properties of $AgBiSe_2$ thin films, 128
Electron spin resonance
structural characterization of CVD diamond films using the ESR method, 50
Ellipsometry
anisotropy micro-ellipsometry for in-situ determination of optical and crystallographic properties of anisotropic solids and layers with Ti/TiO_2 as an example, 82
Epitaxy
X-ray double crystal and X-ray topographic characterization of silicon carbide thin films on silicon, titanium carbide, 6H-silicon carbide, and aluminum nitride/sapphire substrates, 23
growth of ZnTe films by ionized cluster beam epitaxy at low temperature, 46
oriented and textured growth of (111) diamond on silicon using hot filament chemical vapour deposition, 160
Etching
reactive ion etching of vapor phase deposited polyimide films in CF_4/O_2: effect on surface morphology, 31
Evaporation
effect of deposition parameters on the optical absorption in thermally evaporated cadmium telluride thin films, 120
optical properties of $AgBiSe_2$ thin films, 128

Fourier transform infrared spectroscopy
change of molecular orientation with post-polymerization of a thin film of *N*-methylolacrylamide prepared with VDP, 66

Germanium
internal photoemission and photoconduction on GeO_2/Ge films, 133
Glow discharge
properties of heavily phosphorous-doped μc-Si deposited by mesh attached cathode-type r.f. glow discharge, 113
Growth mechanism
optical properties of $AgBiSe_2$ thin films, 128

Elsevier Science S.A.

High energy electron diffraction
a novel Ba–Cu–O compound synthesized by pulsed laser deposition, 138

Interfaces
epitaxial effects on film growth and interdiffusion at Bi–Sb interfaces, 76
Ion implantation
formation of Fe–N films containing $Fe_{16}N_2$ phase by ion beam assisted deposition, 63
IR absorption spectra
SiC thin film preparation by ArF excimer laser chemical vapor deposition. Part 1: Rate of photolysis of alkylsilanes by ArF excimer laser and their decomposition products, 70

Langmuir–Blodgett films
preparation and structure of ordered films of iron carboxylate complexes, 143
surface-enhanced Raman spectroscopy of monolayer C_{60} Langmuir–Blodgett films, 147
STM observations of a self-assembled structure of stearic acid Langmuir–Blodgett films with molecular resolution, 150
Laser ablation
a novel Ba–Cu–O compound synthesized by pulsed laser deposition, 138
Laser irradiation
SiC thin film preparation by ArF excimer laser chemical vapor deposition. Part 1: Rate of photolysis of alkylsilanes by ArF excimer laser and their decomposition products, 70
epitaxial effects on film growth and interdiffusion at Bi–Sb interfaces, 76
performance of laser-consolidated plasma-spray coatings on Fe–28Mn–7A1–1C alloy, 95
Lead telluride
anomalous temperature dependence of electrical resistivity in $Pb_{0.8}Sn_{0.2}Te$ thin films, 55

Magnesium
formation of Fe–N films containing $Fe_{16}N_2$ phase by ion beam assisted deposition, 63
Metal-oxide semiconductor structure
internal photoemission and photoconduction on GeO_2/Ge films, 133

Nitrides
formation of Fe–N films containing $Fe_{16}N_2$ phase by ion beam assisted deposition, 63
Nucleation
oriented and textured growth of (111) diamond on silicon using hot filament chemical vapour deposition, 160

Optical properties
comment on: "Correlation between the optical and electrical properties of CdO thin films deposited by spray pyrolysis", 1
effect of deposition parameters on the optical absorption in thermally evaporated cadmium telluride thin films, 120
optical properties of $AgBiSe_2$ thin films, 128
the energy gap of r.f.-sputtered $BaTiO_3$ thin films with different grain size, 165
Optical spectroscopy
structural studies of parasexiphenyl thin films: importance of the deposition parameters, 35
the energy gap of r.f.-sputtered $BaTiO_3$ thin films with different grain size, 165
Organic substances
reactive ion etching of vapor phase deposited polyimide films in CF_4/O_2: effect on surface morphology, 31
structural studies of parasexiphenyl thin films: importance of the deposition parameters, 35
preparation and structure of ordered films of iron carboxylate complexes, 143
STM observations of a self-assembled structure of stearic acid Langmuir–Blodgett films with molecular resolution, 150
thickness and microstructure effects on alcohol sensing of tin oxide thin films, 154
Oxidation
a novel Ba–Cu–O compound synthesized by pulsed laser deposition, 138

Phosphorous
properties of heavily phosphorous-doped μc-Si deposited by mesh attached cathode-type r.f. glow discharge, 113
Photoconductivity
internal photoemission and photoconduction on GeO_2/Ge films, 133
Photolysis
SiC thin film preparation by ArF excimer laser chemical vapor deposition. Part 1: Rate of photolysis of alkylsilanes by ArF excimer laser and their decomposition products, 70
Physical vapour deposition
change of molecular orientation with post-polymerization of a thin film of *N*-methylolacrylamide prepared with VDP, 66
Plasma processing and deposition
influence of process parameters on diamond film CVD in a surface-wave driven microwave plasma reactor, 3
formation of Fe–N films containing $Fe_{16}N_2$ phase by ion beam assisted deposition, 63
performance of laser-consolidated plasma-spray coatings on Fe–28Mn–7A1–1C alloy, 95
Polymers
structural studies of parasexiphenyl thin films: importance of the deposition parameters, 35
change of molecular orientation with post-polymerization of a thin film of *N*-methylolacrylamide prepared with VDP, 66
Pyrolysis
comment on: "Correlation between the optical and electrical properties of CdO thin films deposited by spray pyrolysis", 1

Raman scattering
surface-enhanced Raman spectroscopy of monolayer C_{60} Langmuir–Blodgett films, 147
Reflection spectroscopy
change of molecular orientation with post-polymerization of a thin film of *N*-methylolacrylamide prepared with VDP, 66
Resistivity
anomalous temperature dependence of electrical resistivity in $Pb_{0.8}Sn_{0.2}Te$ thin films, 55

Scanning tunnelling microscopy
STM observations of a self-assembled structure of stearic acid Langmuir–Blodgett films with molecular resolution, 150
Semiconductors
film edge-induced stress in substrates and finite films, 106
Sensors
thickness and microstructure effects on alcohol sensing of tin oxide thin films, 154
SiC films
SiC thin film preparation by ArF excimer laser chemical vapor deposition. Part 1: Rate of photolysis of alkylsilanes by ArF excimer laser and their decomposition products, 70
Silicon
properties of heavily phosphorous-doped μc-Si deposited by mesh attached cathode-type r.f. glow discharge, 113
Silicon carbide
X-ray double crystal and X-ray topographic characterization of silicon carbide thin films on silicon, titanium carbide, 6H-silicon carbide, and aluminum nitride/sapphire substrates, 23

Silver
STM observations of a self-assembled structure of stearic acid Langmuir–Blodgett films with molecular resolution, 150
Sputtering
mixed-sputter deposition of Ni–Ti–Cu shape memory films, 101
the energy gap of r.f.-sputtered $BaTiO_3$ thin films with different grain size, 165
Stress
mixed-sputter deposition of Ni–Ti–Cu shape memory films, 101
film edge-induced stress in substrates and finite films, 106
Structural properties
X-ray double crystal and X-ray topographic characterization of silicon carbide thin films on silicon, titanium carbide, 6H-silicon carbide, and aluminum nitride/sapphire substrates, 23
structural studies of parasexiphenyl thin films: importance of the deposition parameters, 35
properties of heavily phosphorous-doped μc-Si deposited by mesh attached cathode-type r.f. glow discharge, 113
preparation and structure of ordered films of iron carboxylate complexes, 143
Superconductivity
a novel Ba–Cu–O compound synthesized by pulsed laser deposition, 138
Surface and interface states
glancing-incidence and glancing-takeoff X-ray fluorescence analysis of a Mn ultrathin film on an Au layer, 18
surface-enhanced Raman spectroscopy of monolayer C_{60} Langmuir–Blodgett films, 147
Surface conductivity
structural characterization of CVD diamond films using the ESR method, 50
Surface melting
performance of laser-consolidated plasma-spray coatings on Fe–28Mn–7Al–1C alloy, 95
Surface morphology
reactive ion etching of vapor phase deposited polyimide films in CF_4/O_2: effect on surface morphology, 31
Surface stress
film edge-induced stress in substrates and finite films, 106
Surface structure
glancing-incidence and glancing-takeoff X-ray fluorescence analysis of a Mn ultrathin film on an Au layer, 18

Tin oxide
thickness and microstructure effects on alcohol sensing of tin oxide thin films, 154
Titanium
anisotropy micro-ellipsometry for in-situ determination of optical and crystallographic properties of anisotropic solids and layers with Ti/TiO_2 as an example, 82
Titanium oxide
anisotropy micro-ellipsometry for in-situ determination of optical and crystallographic properties of anisotropic solids and layers with Ti/TiO_2 as an example, 82
the energy gap of r.f.-sputtered $BaTiO_3$ thin films with different grain size, 165
Transmission electron microscopy
mixed-sputter deposition of Ni–Ti–Cu shape memory films, 101

X-ray diffraction
X-ray double crystal and X-ray topographic characterization of silicon carbide thin films on silicon, titanium carbide, 6H-silicon carbide, and aluminum nitride/sapphire substrates, 23
structural studies of parasexiphenyl thin films: importance of the deposition parameters, 35
preparation and structure of ordered films of iron carboxylate complexes, 143
X-ray emission
glancing-incidence and glancing-takeoff X-ray fluorescence analysis of a Mn ultrathin film on an Au layer, 18
X-ray total reflection analysis
glancing-incidence and glancing-takeoff X-ray fluorescence analysis of a Mn ultrathin film on an Au layer, 18

Zinc
growth of ZnTe films by ionized cluster beam epitaxy at low temperature, 46
